## Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
<b>Appliance or Appl.</b>	Means an instance of software loaded and pre-configured on a server and/or PCIe Card
<b>Application</b>	Means any software program that performs specific functional tasks other than the operation of the software system upon which the software program runs
<b>Application Server</b>	Means software that executes business or application logic that is made available to a web server for processing requests. Application Servers are typically J2EE application servers or .Net application servers
<b>Application User</b>	Means a single User authorized to use the functionality of the licensed software as integrated with a single unique Application
<b>Client / Connection / Connection Profile</b>	Means any applications or systems which provide functionality separate from that of the software and/or Appliance while providing for the facility to connect to and interact with the software and/or Appliance.
<b>Client Class</b>	Means any ESKM Applications or systems as defined by its value basis for the customer environment by tier level (A – I)
<b>CPU</b>	Means a system in a single integrated circuit package with one or more discrete processing Cores
<b>Enterprise</b>	Means the right to use software worldwide
<b>E-LTU and E-Media</b>	Means products which are electronically delivered only, and as such any reference to FOB Destination or delivery methods that are stated on your purchase order other than electronic shall be null and void with respect to these E-LTU or E-Media products.
<b>Implementation</b>	Means an installation of the software on a single Server or installed on a cluster of Servers which work together as a single installation of the software
<b>Instance</b>	Means each implementation of the application installed on a Server
<b>LTU</b>	Means License to Use
<b>NFR</b>	Means "Not For Resale" units. Such units are to be used for internal development, test, training and demonstration purposes only. Such items may neither be sold to customers, nor be deployed in production for inhouse use, nor for delivering services to customers.
<b>Non-Stop System</b>	Means an HPE high-end server
<b>Platform</b>	Means software that provides a base level of functionality to the User, upon which additional functionality may be added

<b>Subscription Services</b>	Means Hardware or Software provided as a service which allows remote access to the Hardware/Software, support and related professional services
<b>Server</b>	Means any designated computer system in which an Instance or Instances of the software is installed
<b>SDK</b>	Means Software Development Kit which is a set of software development tools that allows the creation of applications for a certain software package, software framework, or similar development platform
<b>Site</b>	Means a license allowing the software to be used at an address (e.g., room number, department number, building number, street address, campus etc.) or a group of addresses specified in the applicable Supporting Material. Site cannot include multiple addresses or addresses in multiple countries or states. Site licenses cannot be moved to an alternate Site after the original purchase without written approval by Utimaco. If no Site address is explicitly specified in the Supporting Material, then the Site address will be the Ship To address specified on the quotation
<b>Term License to Use or Term LTU</b>	Means a software license to use (LTU) which indicates in its license description that the license is valid for a specific period of time such as One Month (1M), One Year (1Y), Three Year (3Y), etc. Term LTU's are not perpetual licenses
<b>Term Support</b>	Means a fixed period support offering that is only valid during the time period of the associated Term LTU
<b>Use</b>	Means to install, store, load, execute and display one copy of the software
<b>User</b>	Means a user whose Use is restricted to the type of software that is being licensed
<b>Virtual Appliance</b>	Means Virtual Machine image designed to run on a virtualization platform (e.g., VirtualBox, Xen, VMware Workstation, Parallels Workstation)
<b>Virtual Machine or VM(s)</b>	Means a computer that does not physically exist but is simulated by another computer
